Brand: RWD Schlatter

Building promoter: Kanton Waadt, Service des Immeubles

Architect: Fruehauf Henry & Viladoms SA

---

Equipping an art museum with doors is always a special feature. Like the building itself, they are always part of the exhibition, must reliably protect valuable items and help to structure the exhibition and guide visits.

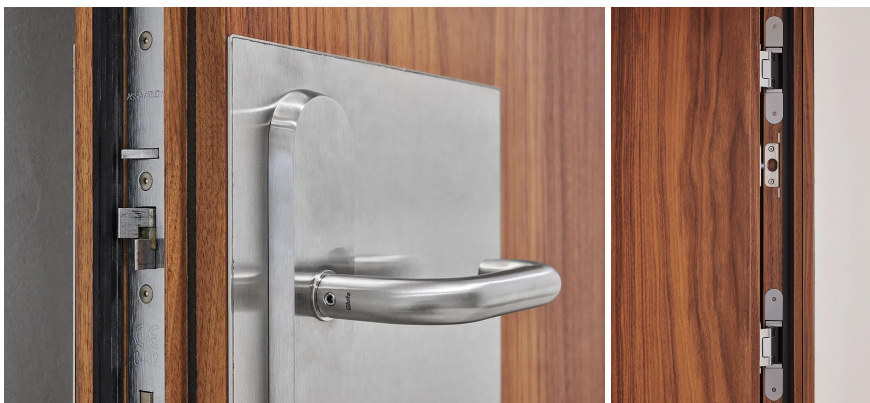

---

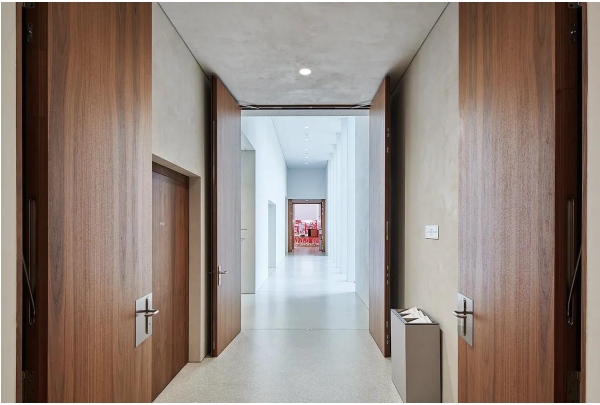

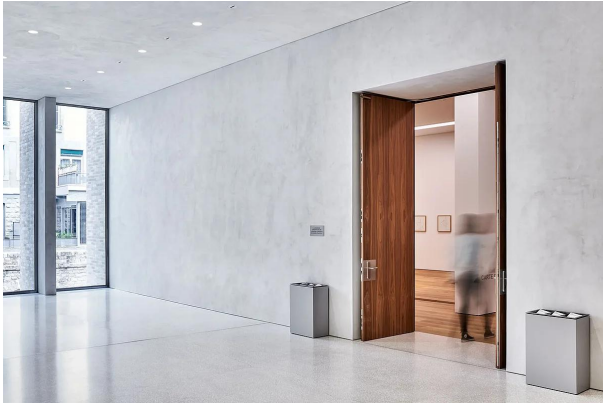

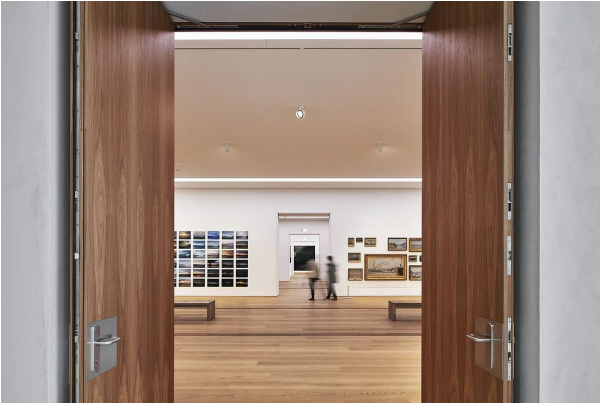

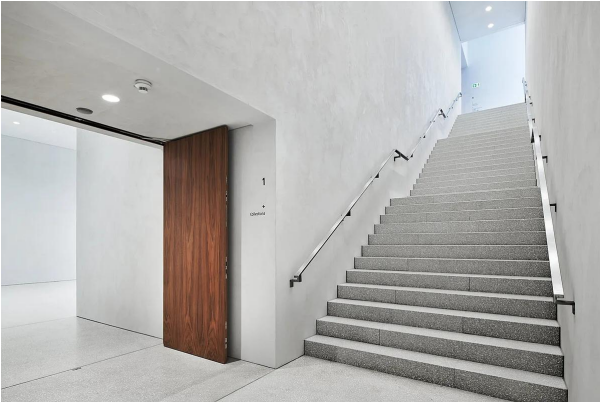

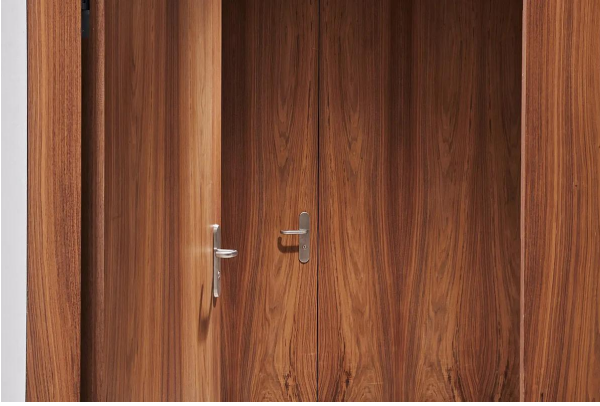

## About the project

The Musée des Beaux-Arts in Lausanne, the art museum of the canton of Vaud, therefore used high-quality, technically sophisticated fire protection doors in special dimensions. The exceptionally large doors provide representation, structure and fire protection in the museum's new building, which was inaugurated in 2019.

## Products

### Functional doors

Functional doors must not only be technically and technically convincing: they must also integrate aesthetically into a room design. From fire, smoke, sound and burglary protection doors to humid rooms and climate-stable doors, we offer you doors that fulfil both requirements.
