# Vector Informatik GmbH Stutt- gart

---

Category: Office / Administration

Year: 2021

Brand: joro

Functions: Fire protection, smoke protection

---

The order included the production and installation of 33 corridor elements that met the highest technical and aesthetic standards.

---

## About the project

Joro multifunctional doors with combined fire and smoke protection requirements of class T90 RS were used to ensure maximum security.

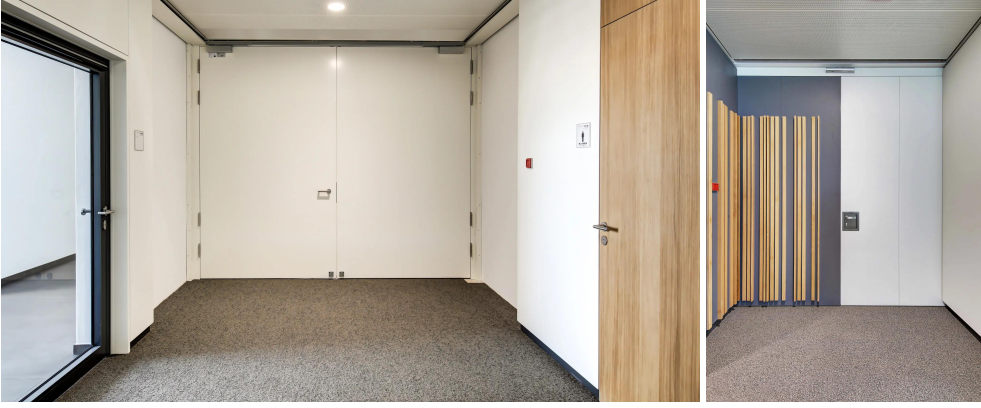

The recess doors, which were fully integrated within the wall, were a particular highlight. With an impressively narrow joint width of only 15 mm, they blended almost invisibly into the architectural design and created a minimalist, modern appearance.

In addition, oversized XXL doors with measurements of up to 3,900 mm in level and 3,750 mm in width were realized. These extraordinary dimensions demanded the highest precision in production and erection and set impressive accents in the overall appearance of the corridor elements.

# Products

## Functional doors

Functional doors must not only be technically and technically convincing: they must also integrate aesthetically into a room design. From fire, smoke, sound and burglary protection doors to damp-proof and climate-stable doors, we offer you doors that meet both requirements.

## Interior doors

Interior doors are more than just passages: they emboss the atmosphere of a room. We offer you a complete range of interior doors and casings - made of wood, glass, steel, CPL, HPL and for a wide variety of styles.
