Vienna House Andel's Berlin

Category: Lodging establishments

Year: 2008

Brand: joro

Functions: Smoke protection, fire protection, sound insulation

The project comprised the fit-out of a hotel with a capacity of 557 rooms and suites, spacious conference and exhibition areas and an elegant ballroom.

About the project

The order included the delivery and installation of a total of 1,000 interior doors, including 557 room entrance doors, which were designed as smoke protection doors with integrated sound insulation ($R_w, P = 42$ dB).

Particular attention was paid to the special doors, which were produced with impressive dimensions of up to 2,970 mm in level and 2,015 mm in width, as well as several secondary doors, which were designed as T30 fire protection doors with an additional smoke protection function. The doors were lacquered in black ash and fitted with flush glass plates on which the room numbers were discreetly integrated.

Another design element was the wall paneling of the portals of the room entrance doors. The door frames were seamlessly integrated into the wall paneling, creating a harmonious overall picture and an exclusive ambience. This combination of functionality and aesthetic sophistication underlines the high-quality design of the project.

Products

Functional doors

Functional doors must not only be technically and technically convincing: they must also integrate aesthetically into a room design. From fire, smoke, sound and burglary protection doors to damp-proof and climate-stable doors, we offer you doors that meet both requirements.

Interior doors

Interior doors are more than just passages: they emboss the atmosphere of a room. We offer you a complete range of interior doors and casings - made of wood, glass, steel, CPL, HPL and for a wide variety of styles.
