Hotel Travel Charme Ifen Kleinwalsertal

Category: Lodging establishments

Year: 2010

Brand: joro

Functions: Smoke protection, fire protection, sound insulation

The project comprised the fit-out of a hotel with a capacity of 87 double rooms, 5 family rooms, 25 junior suites and 8 suites.

About the project

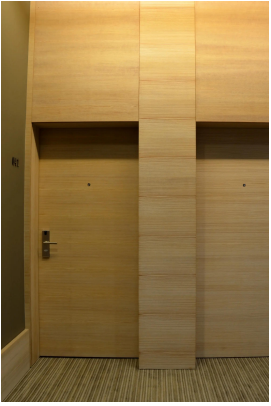

The order included the delivery and installation of a total of 450 doors. These included room entrance doors, which were versioned as soundproof doors with a value of $R_w, P = 45$ dB, as well as a larger number of multifunctional doors. These combined fire and smoke protection in accordance with the T30 RS-1 EI230 C5 and T30 RS-2 EI230 C5 standards.

The doors stood out with an exclusive surface made of cross-veneered larch with a maximum annual ring width of 5 mm. The surface was heavily brushed, honey-colored lime and lacquered, creating a warm and high-quality look.

The door frames were produced as lining frames with a block frame look and fitted to the wall paneling with a cladding depth of 40 mm. Skirting boards with a thickness of 38 mm closed the doors harmoniously into the room concept and underlined the perfect integration into the upscale design of the hotel.

Interior doors

Interior doors are more than just passages: they emboss the atmosphere of a room. We offer you a complete range of interior doors and casings - made of wood, glass, steel, CPL, HPL and for a wide variety of styles.

Functional doors

Functional doors must not only be technically and technically convincing: they must also integrate aesthetically into a room design. From fire, smoke, sound and burglary protection doors to damp-proof and climate-stable doors, we offer you doors that meet both requirements.
