# Federal Ministry of Economics and Technology Berlin

---

Category: Mixed use

Year: 2014

Brand: joro

---

The order included the production and installation of high-quality doors for the ministerial level, which met the highest functional and optical requirements.

---

## About the project

The double doors achieved an impressive sound insulation value of up to  $R_w, P = 57$  dB. The "American oak" veneer used was prepared by the client and precisely matched to the wall paneling. The veneer was processed exactly according to to and was then etched according to a specified color sample to create a harmonious overall appearance.

Additional highly sound-insulating door-sets with a sound insulation value of  $R_w, P = 45$  dB were also delivered. These doors were fitted with covered door handles and fully integrated into the wall paneling, ensuring an elegant and seamless look.

What was remarkable about this project was the short delivery time of only four weeks after completion of all technical clarifications. These high-speed special doors impressively demonstrate the ability to implement demanding projects in the shortest possible time and with the highest quality.
