Head office of ČSOB Bank for the Czech Republic

Category: Office / Administration

Year: 2019

Brand: LIGNIS

A total of 64 doors were delivered for the project and installed directly on location.

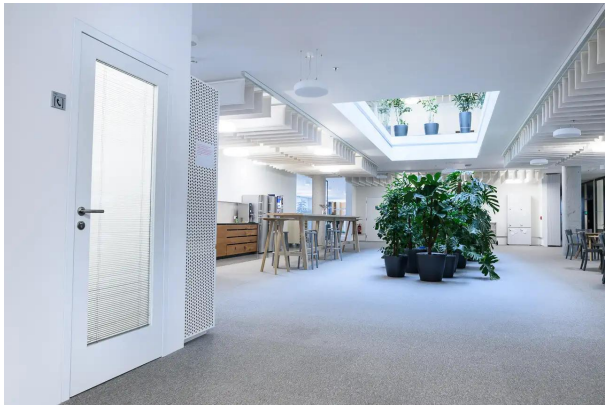

Special features

The special features of the doors are particularly noteworthy: some models were equipped with ventilation slats between the glass panes and acoustic damping. The order also included 2.94 meter high EI30 class fire doors.

All door frames were built in flush with the wall in a modern shadow gap design, which enabled seamless integration into the architecture. The concept was complemented by doors with reversed opening direction, which met the highest functional and aesthetic requirements.

Products

Interior doors

Interior doors are more than just passages: they emboss the atmosphere of a room. We offer you a complete range of interior doors and casings - made of wood, glass, steel, CPL, HPL and for a wide variety of styles.

Functional doors

Functional doors must not only be technically and technically convincing: they must also integrate aesthetically into a room design. From fire, smoke, sound and burglary protection doors to damp-proof and climate-stable doors, we offer you doors that meet both requirements.

Partition wall systems

Partition wall systems are a key tool for flexible room design in modern architecture. They make it possible to structure rooms intelligently without restricting the open and adaptable nature of the plan.
