Premier Inn Hotel Leipzig

Category: Lodging establishments

Year: 2018

Type: New building

Brand: Kermi

The Hotel Premier Inn Leipzig City Opera is centrally located in the Saxon city of culture between the main train station and the historic city center. It is an ideal starting point for a discovery tour of Leipzig and makes getting around simple.

About the project

The hotel has a total of 182 rooms. In the underground parking garage, there is a storage system that is unique in the hotel industry in Germany, which supplies the parked electric cars with electricity. The rooms have been fitted with high-quality Kermi shower cubicles from the LIGA series, among other things. The special folding doors are ideal for the barrier-free rooms in the hotel. When not in use, they can be folded against the wall with simple ease and are also level with the floor and accessible without tripping hazards.
